

George Washington Phi Gamma
The George Washington University, Washington, DC
Chartered April 24, 1981. Number 124.

Goals for 2007-2008

Our goals for this year were to increase member involvement in departmental activities, promote professional development, and to encourage participation in service activities.

Activities

During the past year, the members of the Phi Gamma chapter have been active within the Department of Mechanical Engineering as well as in the professional field. The Phi Gamma Chapter successfully held an event during Engineer's Week. Some members worked at NASA this past year. Other members were busy doing research for The George Washington University, or working for the private sector.

The Phi Gamma chapter has continued to hold inductions each semester for outstanding students in mechanical engineering. The chapter has also continued to celebrate the inductions with a dinner at various local restaurants that meet the same standards the newly inducted members are held to.

Harry Ingram, 2008-2009 elected President for the Phi Gamma chapter, along with member Matt Chamish will attend the National Convention at Muchigan University in Ann Arbor, Michigan. Inductions were held in November and April. Ten new members were accepted in to this elite organization.

Graduates

Andrew Barbosa
Alexndra Legnos
Mimi Roberts
Gregory Sans
Simon Murtha Smith

Names of New Members

Fall 2007 Inductees

Harry Ingram	Erik Pfliederer
Greg Sans	James Stephenson

Spring 2008 Inductees

David Rosenberg	Brett Shank
Gwen Tawresey	David Vaughn

Plans for 2008-2009

In the next year, the Phi Gamma chapter plans to continue to increase involvement in departmental activities and to encourage involvement in campus wide and community service activities. The Phi Gamma chapter will continue to hold a contest during Engineer's Week. Inductions will be held in mid-October and early March. At least two members will attend the National Convention and report back to the rest of the group.
